

Go.Learn App for Mobile Devices

The Docebo application is not usable on mobile devices with a screen size less than 8 inches. This applies to most cell phones. To access the platform using your cell phone, you must download the “Go.Learn” app. Through the Go.Learn app, you can easily attend courses and complete training material. You may also apply for the course through Go.Learn, but for the best experience, we recommend submitting your application on a laptop or tablet.

The Go.Learn mobile app is available for both iOS (including iPads) and Android devices. You can download the app by searching for “Go.Learn” in the Apple Store or Google Play Store, or by going to the appropriate link below.

IMPORTANT NOTE: There is more than one “Go.Learn” app; please download the app with the blue logo pictured at the top of this page.

To access the app, tap on the **app’s icon** to launch it. In the text box labeled *Platform URL*, type in <https://learn.htim.com>. Then, tap **Proceed to Login Page**.

Click on the **APPLY** button at the bottom of the screen if you do not already have a Username and Password.

If you do already have a Username, insert your Username and Password, then sign in by tapping the **SIGN IN** button. You may tap on **Keep Me Logged In** if you want the app to automatically log you in when you launch the app on your device in the future.

Please send an email to info@htim.com if you experience any issues with downloading or accessing Go.Learn on your mobile device.
